

Industry Update 1

A Ministerial Taskforce consisting of Industry leaders has been assembled in order to address timber truss issues arising from the Riverside Golf Club tragedy. The Taskforce is currently preparing recommendations for the design, manufacture and installation of timber roof trusses.

One of the leading recommendations is expected to be that only truss fabricators will be able to provide roof designs and layouts for council approval.

Regency Building Supplies provides fully engineered timber roof and floor truss systems complete with comprehensive truss calculations and detailed layouts using world leading software and truss manufacturing components from MiTek Australia Limited.

Why Regency Building Supplies?

- Values of customer service, innovation and professionalism.
- Experienced truss designers providing expert advice.
- A complete quantity estimating, quoting and detailing service.
- Council liaison services.
- Site measure service available.
- Building plans accepted electronically.

A Fully Engineered and Guaranteed Truss System

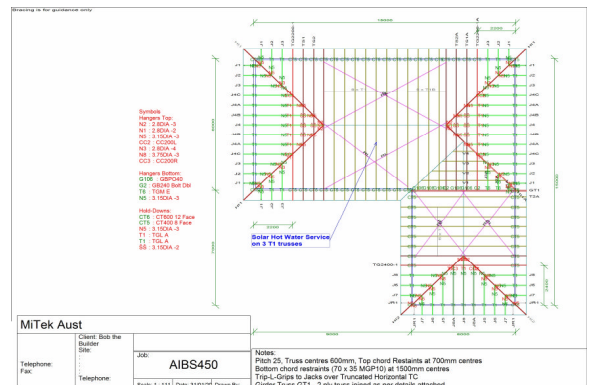

- Clear detailed A3 laminated colour layouts.
- All fixing requirements designed and detailed on layout.
- All trusses subject to an internal quality audit.
- All truss webs are a minimum of 90x35mm NOT 70x35mm.
- All timber components are termite resistant H2 treated pine.

Premier Manufactured Timber Roof Trusses

- Flexibility of design to accommodate any roof shape.
- Guaranteed fully trussed roof system.
- Fully engineered to accommodate heavy loads.
- All roof components labelled as per layout.
- No timber wastage or surplus roof materials left on site.

Superior Manufactured Timber Floor Trusses

- Lightweight for ease of installation.
- Fully engineered and guaranteed floor truss system.
- Open spaces for installing services (e.g., plumbing).
- Many end and fixing detail options.
- Superior strength over greater spans.
